

MHO version 1.52 special shop item modification file 2026.05.03

● Reminder & Notes:

- If necessary, please remember to back up your old files before installation.
- This file is intended for single-player use only and is not suitable for online or server-based players.
- <https://github.com/mtzimas92/MHServerEmu-CatalogManager> ,
Thanks to the author for creating this tool. I've used it to complete the modifications. .

● Installation:

- Installation must be done while both the game and the standalone server are not running.
- This patch includes multiple Catalog*.json files, the blue-highlighted files shown in the image below.
- Copy all Catalog*.json files into `{game Folder}\MHServerEMU\Data\Game\MTXStore\` to complete the installation.

● Others:

- All Catalog*MODIFIED.json files were generated using MHServerEmu-CatalogManager and can be further edited with that tool.
- The catalogManual.json file contains items not found within MHServerEmu-CatalogManager, manually created based on data from the database websites listed below. These entries can only be edited manually.

There is a comma.

No comma

1. Scroll to the very end of the file.
2. The yellow area on the left is a group of objects. Copy the yellow area and paste it at the end of the file to add a new entry. Just modify the fields, and the new entry is done.
3. Pay attention to the red-highlighted comma—the last entry should not have a comma.
4. The blue-highlighted Skuld is a serial number; just increase it by one based on the previous entry.
5. The green-highlighted fields Description and Title are not important—you can put anything there.
6. The gray-highlighted ItemPrototypeRuntimeIdForClient is the most important—this is the item code.

Go to the [Marvel Heroes Item DB](#).

Find the item you want to add, copy its PrototypeId, and paste it into the ItemPrototypeRuntimeIdForClient field. Then save the file.
